

Want to keep track of your preventive services?

Medicare covers many **preventive services** to help you stay healthy. Talk with your health care provider about which of these services are right for you. You can also use Medicare’s Blue Button to download your Original Medicare claim information. This will help you track the services you had and understand the services you might need. See page 136 for more information about the Blue Button. You can also visit bluebuttonconnector.healthit.gov to learn more about applications and services that are available to help you analyze your health information.
